

KEURIG

**BOLT**

## **The Keurig® revolution just got bigger — a perfect pot of coffee, made simpler and brewed faster.**

Are you frustrated with your conventional pot coffee maker—the messy grounds, burnt coffee, and waiting for a fresh pot to brew? Introducing the Keurig® Bolt™ Carafe Brewing System, a commercial-grade system that delivers faster brew speed than the market-leading 120V pot coffee maker and features high quality, consumer-recognized coffee brands. The Keurig® Bolt™ system will transform the way you think about brewing a pot of coffee whether it be in a workplace, hotel, or cafeteria setting.

- Convenient and easy to use
- Operationally efficient with no mess or cleanup
- Fresh gourmet coffee made consistently every time

Simply place the Bolt™ pack into the brewer, press the Brew button and enjoy a 64 oz. pot of coffee in about two minutes.

**Finally, a perfect pot of coffee with Keurig® convenience and speed.**

## The Keurig® Bolt™ system is ideal for:

### Medium to Large Sized Workplaces

Busy people  
Need to serve in volume  
Need to do so quickly

### Limited Service Restaurants

Moderate coffee business  
New breakfast programs  
Need for off-peak solution

### Hotel and Hospitality Facilities

Featured in the lobby  
Seen at the bar  
Kept behind a kitchen counter

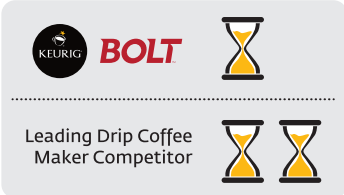

### Convenience Stores

Non-traditional locations  
Secondary source of coffee  
Lower volume SKUs

### Colleges and Universities

Kiosks  
Bookstores  
Academic lounges

# The Keurig® Bolt™ System Advantage

**KEURIG BOLT** 

Leading Drip Coffee Maker Competitor  

### Faster On-Demand Brewing Speed

The Bolt™ brewer can deliver 64 oz. of delicious coffee in about two minutes vs. four minutes or more for a leading pot (120V) coffee maker.

### Consistent Quality and Taste

The sealed Bolt™ packs keep coffee grounds fresh. Since the coffee is pre-measured, your freshly brewed coffee will always have the excellent, consistent taste the Keurig brand is known for.

### Greater Convenience, Better Operating Efficiency

The Keurig® Bolt™ system uses convenient Bolt™ packs. With the ideal brewing environment inside, these packs require no pre-measuring and have no messy filters or spilled grounds to clean up.

Hot Water Dispenser

## The Bolt™ Thermal Carafe

The innovative engineers at Keurig have crafted a custom Thermal Carafe, specially designed for use with the Keurig® Bolt™ brewer.

### Secure Operation

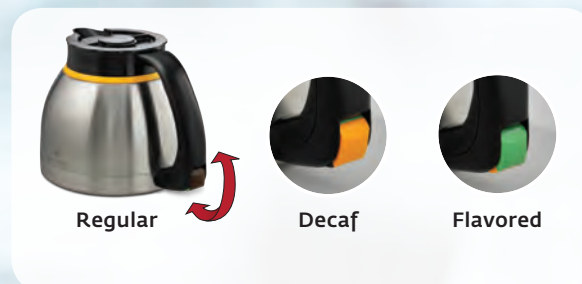

The Bolt™ brewer contains a sensor system that determines when the Thermal Carafe is securely in place, the flip lid is open, and it is safe for brewing to begin. If the Thermal Carafe is removed or incorrectly inserted, the brewing process will stop immediately.

### Thermal Performance

To maintain the ideal combination of taste, freshness, and temperature, Keurig recommends holding coffee within the Thermal Carafe for up to one hour. The optimal temperature range for coffee taste and freshness is 175 - 185° F. When starting at room temperature, the Thermal Carafe will maintain this temperature range for up to one hour. When pre-heated, the Thermal Carafe will maintain this temperature range for up to two hours.

### Coffee Variety Identifier

A variety identifier has been built into the handle of the Thermal Carafe so that you can specify which type of coffee it contains.

One Thermal Carafe is included with each Bolt™ brewer purchase.

## Commercial Grade & Foodservice Ready

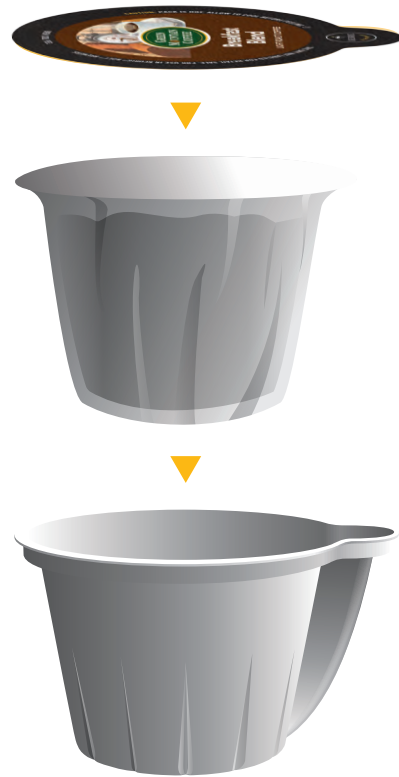

This is a rugged brewer, built to commercial specifications and UL-approved for commercial use only.

This brewer has passed extensive sanitation testing and analysis by the National Sanitation Foundation (NSF) and has an NSF-4 rating, meaning it is well suited for foodservice environments.

## How The Bolt™ Pack Works

What would a Keurig® system be without an ingenious method of housing the coffee? The Bolt™ system features our new Bolt™ packs. No messy filters to deal with and no spilled grounds to clean up. Simply place the Bolt™ pack in the brewer, press the Brew button, and a fresh 64 oz. pot of coffee will be ready for you in about two minutes. Since the sealed Bolt™ packs keep the coffee grounds fresh, you'll enjoy consistently excellent coffee time after time.

## Recycling Bolt™ Pack Cups

Recycle your Bolt™ pack's plastic cup wherever #5 plastic is accepted. Visit [www.boltrecycling.com](http://www.boltrecycling.com) for more information on whether your community is able to recycle #5 plastic today. If a recycling center is not available in your area, you have the option to recycle your used plastic cups through our mail-back program. Visit [www.boltrecycling.com](http://www.boltrecycling.com) for more information.

**COOL**—The Bolt™ packs are **HOT** after brewing. Please allow time for them to cool.

**PEEL**—Carefully peel back tab to separate foil lid and filter from cup.

**RECYCLE**—Recycle your packs wherever #5 plastics are accepted.

## Bolt™ Pack Varieties

Keep your employees and customers delighted with fresh and delicious gourmet coffee from the brands they love, delivered with Keurig® convenience and speed. Choose from smooth or bold regular coffees, as well as satisfying decafs and delightful flavored varieties.

### Green Mountain Coffee®

From carefully sourcing and roasting the highest quality beans, to supporting small farms and reducing our environmental impact, we focus on what's important. That's why we believe a good cup of coffee can change your day ... but a great cup of coffee can help change the world.

### Tully's® Coffee

With roots in the Pacific Northwest, Tully's® signature is the art of the slow roast. From the satisfying aroma to the full-bodied flavor, you can taste the time taken in every satisfying cup. Now we invite you to take your time discovering it.

### The Original Donut Shop®

The Original Donut Shop® Coffee lingers on your tongue and warms the soul. It brightens your day like a big scoop of sprinkles. If you go through life as if it's a sweet surprise filled with jelly and covered in frosting, The Original Donut Shop® Coffee is for you.

**With over 20 gourmet coffee brands in our Keurig brewing system portfolio, there are always opportunities to grow our Bolt™ pack variety options.**
