

Tork® paper towel solutions are smarter

Choosing a hand drying solution for your restroom?
Make a fully informed choice.

Choosing a hand drying solution for your restroom?

A fully informed decision takes into account many important factors. Here are 5 key areas to think about when selecting a hand drying solution:

Speed:

Jet air dryers can service only one person at a time and take **10¹ or more** seconds per person. Tork PeakServe® faster paper towel dispensing serves time-pressured guests in **3** seconds² and then they can step aside.

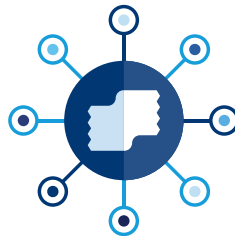

Jet air dryers can take up to **10** seconds per person

Image:

71% of guests at high-traffic venues have had a bad washroom experience.⁶ **Jet air dryer noise** can be excessive and disruptive, especially to those with sensitivity to sound. 53% of guests prefer paper towels over other hand drying methods.⁷

53%
of guests prefer paper towels

Multi-Use and Comfort:

Jet air dryers only do one thing. Paper towels support many uses beyond hand drying such as: blowing noses, wiping mouths, adjusting cosmetics, medical needs, diaper changes, helping avoid dirty handles.

Paper towels support many uses

Hygiene Critical:

Where hygiene is critical, Tork paper towels protect. Jet air dryers spread up to 10x more germs into the air³ and spread more germs in the environment.⁴ The **friction** of drying with paper towels removes more bacteria than other methods.⁵

Jet air dryers spread

10x
more germs

Sustainability:

One at a time towel dispensing reduces consumption and waste. Sustainably sourced, third party certified and compostable paper towels can be diverted from landfill when sent to commercial composting sites to meet zero waste goals.

Certified compostable paper towels

All things considered, Tork is the smart choice.

There are many kinds of restrooms, and many factors to choosing a hand drying solution. Make the best choice for your restrooms by thinking ahead to a wider set of business and user needs and preferences.

PeakServe® faster dispensing serves guests in only

3 seconds—
quicker than jet air drying time.¹

Focus Area 1:

Where Speed and Efficiency is Important —

Do your restroom visitors need to get in and out quickly so they can get back to class, work, meetings, or events?

Problem:

Jet air dryers can service only one visitor at a time and can take 10 seconds or more each.

- Long lines and wait times can lead to negative reviews and social media comments.
- Even worse, visitors may avoid washing or wipe hands on clothes—non-hygienic options resulting in cross-contamination issues.

Tork solution:

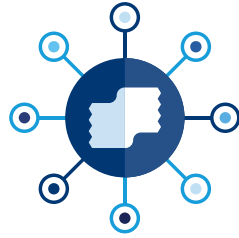

- **With Tork paper towel solutions, visitors can take one towel and step aside.**
- Contributes to shorter lines and less wait time — improving satisfaction.
- Supports a consistent traffic flow even at peak times.

Tork solution: Tork PeakServe® Continuous™ Hand Towel Dispensers

¹Tork PeakServe independent field test

Focus Area 2:

Where comfort is important —
How will you cater to the many needs of your restroom visitors beyond drying hands?

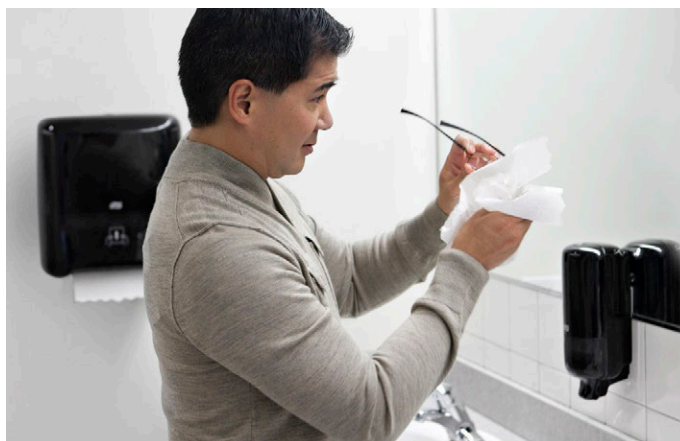

Problem:

Jet air dryers only do one thing: dry hands. But restroom visitors have many more needs — which Tork paper towels support.

- Blowing noses
- Wiping mouths after meals
- Resolving medical issues
- Adjusting cosmetics
- Avoiding direct contact with dirty faucet, toilet and door handles

Tork solution:

- **Without convenient access to paper towels, cross-contamination possibilities increase and visitors may avoid restrooms entirely.**
- With Tork paper towel solutions, visitors will be more satisfied, more comfortable, and enjoy a healthier experience.

Tork solution: Tork Matic® Hand Towel Roll Dispensers

Focus Area 3:

Where hygiene is critical —
How will you minimize contamination and maximize hygiene with multiple visitors touching the same surface?

Problem:

Consider this: you rarely will find jet air dryers in critical food handling and healthcare settings (e.g., hospitals, nursing homes). The risks are too great.

- If hands are poorly washed, jet air dryers spread higher levels of viruses and microbes into the air. Up to 10 times more compared to paper towel drying.¹
- They also spread more germs throughout the environment.²

Tork solution:

- **In contrast, drying hands with paper towels lowers the risk of spreading bacteria.**
- The friction of drying with paper towels removes more bacteria than other methods.³
- By using a clean disposable towel, contamination from hands to other surfaces is reduced and germs stay in the waste bin where they belong.

Focus Area 4:

Where your image matters —

Is reducing complaints and providing a consistent image important?

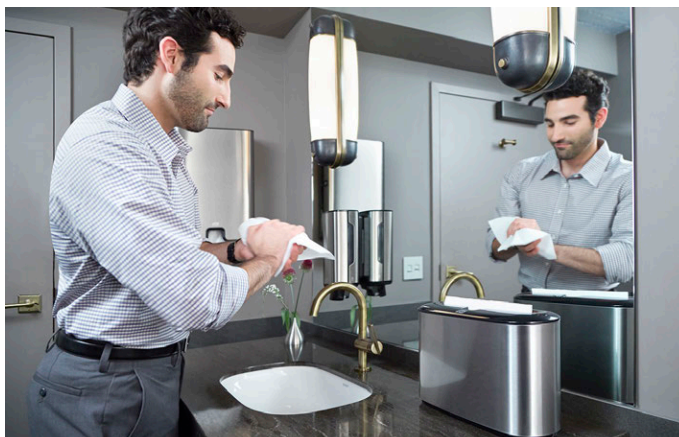

Problem:

The spray of water from jet air dryers may lead to pools of water, safety issues, unsightly damage and unpleasant smells.

- Jet air dryer noise can be excessive and disruptive, especially to those with sensitivity to sound.
- Without consistent cleaning, the appearance and functionality can decrease and lead to dissatisfied restroom visitors also leading to negative reviews and social media comments.

Tork solution:

- **In comparison, properly placed Tork paper towel dispensing solutions result in less water on floors and other areas.**
- With minimal to no sound, paper towel dispensers don't detract from a peaceful restroom experience.

Tork solution: Tork Xpress® Image Design™ Dispensers

Focus Area 5:

Where sustainability matters —

Are you looking for sustainable restroom solutions that meet your zero waste or circularity goals?

The real connections between Tork paper towels and sustainability might surprise you.

- All fiber for Tork paper towels is sustainably sourced. Forest Stewardship Council® (FSC®) chain of custody third-party certifications ensure responsible sourcing.
- A large majority of Tork paper towels are third-party certified compostable and can be diverted from landfill where commercial composting is available.
- Your own recycled office paper and corrugated material can be added to the recycled fiber stream at our manufacturing sites and made into new Tork tissue products with Tork Closed Loop Recycling.
