

# Schiavone Construction

Secaucus, New Jersey

## Project Goals

Schiavone Construction is a major general contracting firm in the New York metropolitan area. Its previous offices, in Secaucus New Jersey, were dated and the layout had evolved over the years. "We never developed a comprehensive plan or design which resulted in an inefficient use of space. When our current lease was up for renewal we chose to move to another floor in our same building and design an office to meet our specific requirements, all while realizing a corporate cost savings."

## Project Benefits

The new office space is modern and clean. It provides a bright environment and is thoughtfully designed to meet the company's needs.

## Favorite Space

Favorite spaces within the new office include the Break Room and the modern industrial feel of the general open office areas.

## What Matters

The priority for Schiavone Construction during this renovation was to provide its employees with a beautiful, new office space to meet the functional and organizational needs of individuals. The layout of the office provides an efficient and comfortable work area throughout. An additional priority was to complete this project in a timely manner, as delays could have impacted its partner companies as well as numerous project worksites close to home.

*"It was a pleasure working with W.B. Mason on this project. They were attentive and responsive to all our requests and the needs of a busy office on a timeline."*

— Schiavone Construction
